Q) There is an organization A with multiple departments. Design a network for HR department and size is 10 user. Also show the communication b/w user number and User no. 5 of network.

→ Objective → To understand how to configure the IP address. By this question we are learning to make a network inside any building by using switch, copper & straight through wire and different PC.

Step 1 → Design a network

Step 2 → Assign IP to every PC

Step 3 → Confirming the network by sending message from PC1 to PC5
